

Pharmaceutical & Biotechnology

The APS pharmaceutical and biotechnology team has experience with complex design and construction requirements of cGMP facilities. Our staff of architects, engineers and designers have the expertise to execute all projects from Programming/Master Planning and Design through to Construction, Validation and Commissioning of a successful FDA approved facility.

- Process Design
- P&ID Development
- Critical Utilities
- Laboratory Design
- Clean Room Design
- Process Optimization
- cGMP Upgrades
- FDA Validation Services
- Construction Management

“ *Delivering critical expertise to the pharmaceutical manufacturing industry.* ”

APS is a full-service technology company offering a wide variety of engineering and project services to a select list of worldwide clients. We provide experienced project managers, engineers and designers, all with real world field experience in their respective disciplines.

We partner with our clients and strive to share their vision of success through the application of practical, constructible and fiscally responsible designs.
